Memorandum

To all administrative personnel: There are a number of new policies and regulations in effect and each administrator should be apprised of them. Now that the electronic listening devices have been installed in all Institute facilities, each of you will be assigned a tape machine which will allow you to gather student opinion on the various problems facing the Institute. The information retrieval system is located in the Brooklyn Hospital, recently acquired by the Institute to be used for future indoor gymnasium space.

There are several new policies regarding student discipline. Any student caught smoking will be expelled as a fire hazard. Be careful not to mistake a student for a faculty member: the faculty members wear ties. There have been initial contacts made with a Cuban refugee group for policing the Institute campus against student disruptors. At no time, and this is without exception, will we allow the educational processes at this Institute to be hindered unless by faculty or by you personally. Anyone not signing the Pratt loyalty pledge will be questioned by the newly organized Civic Intellect Association. This is particularly worth noting as the new tuition increase of three dollars per day will soon go into effect. We expect, around springtime, a mild disturbance at which time we will move our administrative operations to the Montauk Club.

It is a pleasure to announce at this time our new community representative, Uncle Remus, whose vital experience in the media should do much to promote our cause in Brooklyn.

The administrative staff is to be commended for the enactment of new policies. Substituting K'nitions for P.I. Shop food is an excellent cost saver which will allow us to place security guards in dormitory rooms and finally protect our freshmen and sophomores. The lawn fee will certainly pay for the cost of the 'We Are All One' sign which adorns the Main Building. The introduction of smoke signals by the Registrar replacing the registration cards will keep the IBM computer free to optimize administrative staff benefits. Leasing the basement of the Pink Avenue building to the Playboy Club should bring in additional alumni funds, which will allow us to proceed with the new building plant. By September the planting of the prison ivy and the erection of the tower will have taken place and ground will be broken. Your voluntary decision to cut lunch hours from 4 to 3 hours each day is appreciated and the fact that a few of you have been working is a source of gratification to everyone. As we approach the summer, it is with the anticipation of future excellence. Remember, a Tiffany cannot be achieved without a South Africa.
